Rider Scrubbers

Advance

FACT SHEET

Flexibility for every kind of clean.

The Advance Condor® rider-scrubber with EcoFlex™ System lets you clean green and still meet the highest expectations for clean floors. With the industry's most flexible floor-scrubber technology, you can develop a sustainable cleaning routine and quickly adjust to whatever the job demands. Be prepared to get more out of your budget, clean with less impact to the environment and maintain clean floors when you do.

Operators can quickly and easily select the right blend of pad pressure, water and detergent to tackle any cleaning challenge. Here are just a few of the flexible cleaning modes:

- **Water Only** – Perfect for removing surface dirt and maintaining the clean look of floors. Water-only mode eliminates the impact of detergents on the environment and reduces cleaning costs.
- **Ultra-low Detergent** – Well suited for routine cleaning where a small amount of green-certified detergent will do the trick. Water and detergent are dispensed separately at the scrub deck, eliminating solution waste.
- **Standard Detergent** – The tough cleaning you expect. At standard detergent, pad pressure and flow rate, you'll have a combination powerful enough to pull stubborn dirt, grease, and oil from surfaces.
- **Burst of Power** – For deep, restorative cleaning or unexpected challenges. EcoFlex's burst of power temporarily increases your machine's pad pressure, detergent use and flow rate at the touch of a button.

If you are looking for a highly productive, rugged, battery rider scrubber, consider the benefits of the easy-to-use and easy-to-maintain Condor. The Condor is designed as a true industrial rider scrubber with reliability, productivity, and ease of use and maintenance built in. It features the most scrub path options of any machine in its class. A steel chassis and metal bumpers stand up to tough operating environments while thick high density polyethylene tanks will not dent, crack, or corrode.

The Condor with EcoFlex System delivers the flexibility to clean your floors more efficiently. By using a system that cleans like you do, you'll reduce your cost to clean and create a more sustainable cleaning program.

Advance Condor™ & Condor™ with EcoFlex™ System

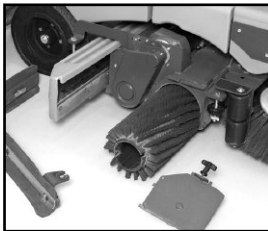

Rider Scrubbers

EcoFlex™ System models have One-Touch™ activation for an on-demand cleaning burst of power.

One-Touch™ traction control limits slips while maximizing traction.

No-tools concept allows fast and easy replacement of brooms and squeegees for minimal downtime.

A large range of interchangeable disc and cylindrical scrub deck options provide the right tools for the specific job.

Large 70-gallon solution and recovery tanks translates into more on-the-floor time and less dumping time.
