Sweeping just became easier...

With dual main brooms, dual side brooms, and a 26 inch wide sweeping path, the Terra® 26M manual sweeper offers outstanding sweeping performance, picking up debris from fine sand to larger trash such as crumpled paper and plastic beverage bottles. Dual side brooms sweep cleanly alongside baseboards and curbs, providing a clean sweep path. The fast and efficient Terra 26M is much more productive and effective, than standard push broom sweeping.

Sweeping with the Terra 26M minimizes dust, which means better indoor air quality for building occupants and the dramatic reduction of scattered dust particles. Its quiet operation is ideal for noise-sensitive environments.

The Terra 26M is easy to operate and maintain. The three-position folding handle can easily be adjusted for operator comfort. When the handle is folded over the top of the machine, the machine can be stood upright, or even hung from the wall, to minimize its storage footprint and extend the life of the brooms. The handle automatically locks the debris hopper in place to prevent accidental dumping during storage.

Ideal for a wide variety of hard surfaces, both indoors and out, the Terra 26M provides efficient and effective sweeping results.
