

Adgility™ XPB

Battery Backpack Vacuum

FACT SHEET

The Adgility™ XPB is a cordless backpack vacuum powered by a Lithium Ion battery, the latest in cordless technology, offering 30 minutes of cleaning time. While one battery is powering the machine, the second battery can be charging. This change-out feature allows for continuous run time.

When your application has limited access to electrical outlets, where safety restrictions require a cordless option or where mobility is important, the Adgility XPB battery backpack vacuum will meet those cordless vacuum needs.

Like the corded Adgility XP, the cordless Advance Adgility XPB backpack vacuum delivers a whole new level of comfort, quiet, performance, and affordability for multi-surface cleaning in close quarters. Backpack vacuums have long been favored for cleaning offices, classrooms, and other facilities with both hard and soft flooring, and tight spaces. Never before has there been a backpack as comfortable and effective as the Adgility XP selection of vacuums.

The Advance Adgility XPB sets a new standard for light weight and quiet sound level among battery powered backpack vacuums. With a sound level at only 58 dB A, the Adgility XPB is quieter than its battery operated competitors. Quiet enough to use any time of day without fear of disturbing building occupants.

With the battery attached, the Adgility XPB weighs just over 18 pounds – substantially less than its competitors. This light weight design, in combination with the premium, cushioned harness system, results in significantly less operator fatigue and better productivity. The Adgility XPB moves with the operator when bending or twisting and is the ultimate in ergonomic design.

TYPICAL APPLICATIONS INCLUDE

- None or Limited Electrical Outlets
- Education Buildings
- Office Buildings
- Libraries
- Health Clubs
- Airports / Train Stations / Bus Depots
- Daytime Cleaning

STANDARD FEATURES INCLUDE

- 2 Lithium Ion Batteries
- Charger
