

CaniStar™

Dry Canister Vacuum

Smart cleaning.

A Nilfisk-Advance Brand

CaniStar™

Dry Canister Vacuum

Ideal applications include:

- Hospital/Healthcare Facilities
- Schools and Universities
- Government Buildings
- Supermarkets
- Shopping Malls and Retail
- Office Buildings
- Airports
- Any Facilities Occupied 24 x 7

Superior Cleaning Power, Exceptional Filtration.

Once again Advance is setting standards in vacuum cleaner performance and value. Advance CaniStar™ combines hospital-quiet operation with powerful suction, exceptional filtration options and best in class serviceability. Our engineering teams designed the CaniStar to drive down the cost of cleaning by making it quiet enough to clean during the day yet powerful to tackle the toughest commercial cleaning environments.

The Advance CaniStar is one of our most powerful, rugged and feature filled canister vacuum ever produced. At only 53 dB A it is quiet enough to clean healthcare facilities, hotels, restaurants and commercial office space during the day.

Advance CaniStar is equipped with a powerful 1,100 Watt, 1.5 hp motor designed for continuous commercial duty and over 1,000 hours of operation.

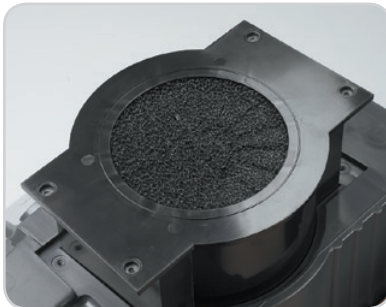

Take the Advance CaniStar to the next level with the optional low cost post fan H.E.P.A. H13 filter. The CaniStar is factory equipped with four levels of filtration as standard. Adding an H.E.P.A. filter and a fifth level of filtration will help ensure a cleaner facility. The CaniStar's true H.E.P.A. filter will capture 99.97% of particles that are 0.3 microns and larger and because it is mounted after the motor it, the debris generated by the motor is subjected to this same level of filtering. Containing more dust while vacuuming hard and soft floor surfaces reduces the cost to clean. Dust that is blown back into the air settles on surfaces that require additional resources to clean later.

Built with the end user in mind, Advance CaniStar features a low center of gravity and three point stance to make it maneuverable and stable. The 50 foot cord and 6 foot hose boosts productivity by providing a longer cleaning reach. The modular click in click out motor cassette, easy filter access, cut and fix hose and cord replacement system make operation and maintenance a breeze.

For Superior productivity and cleaning results, the Advance CaniStar delivers.

The coiled up cord is conveniently stored on top of the machine under the handle.

Built with serviceability in mind, the motor can be changed with a simple screwdriver.

Telescopic wand and accessories make cleaning a multitude of surfaces quick and easy.

Stands on end for cleaning stairs and compact storage.

Low profile wedge shaped design maneuvers easily around obstacles.

Unique side panel design gently diffuses pure exhaust air on sides and top

6 ft (1.9 m) hose for long reach

One of a kind sound deadening labyrinth results in quiet operation, 53 dB A

Sleek compact design with fixed and swivel wheels for nimble maneuverability

Sliding suction control valve for delicate surfaces

Chrome plated steel telescopic wand for years of dependable service and easy cleaning of hard to reach areas

Heavy duty foot operated on/off switch rated for 50,000 cycles

Combination floor tool provides instantaneous changes from soft floors to hard floors without stopping to change tools

FEATURES AND BENEFITS

Larger dust bag and powerful motor saves time and money.

Rugged construction with durable components assures years of reliable service.

Click in; click out motor can be changed by simply removing four screws.

Superior quiet sound permits operation anywhere, anytime.

CaniStar™

Low sound and high performance in a compact package for today's commercial cleaning needs. More than anything else Advance CaniStar™ exemplifies value. Drive down the cost of cleaning by taking advantage of its quiet operation and cleaning during the day. CaniStar has the power to tackle the toughest commercial cleaning applications. Ruggedly built, yet most components are easily serviced maximizing cleaning time.

Reduce the Cost to Clean with CaniStar™

- Lowest cost of ownership of any vacuum – robust design and fewer moving parts.
- Modular motor cassette – no service calls to repair maximizes cleaning time.
- High air flow and waterlift – picks up debris the first time, every time.
- Superior filtration captures more dust – less dusting later.
- Lowest handle weight – faster cleaning with less fatigue.
- Powerful suction – one pass cleaning on the forward or reverse stroke.
- No brush roll – no tangled threads or hair and picks up bulky debris.
- Small lightweight floor tool – cleans hard to reach areas faster.
