

QuickStar™ B

Battery Canister Vacuum

FACT SHEET

Cordless and Quiet – Clean Anywhere, Anytime

The QuickStar™ B battery powered vacuum meets the need for a productive and reliable battery-powered commercial vacuum that allows unrestricted cleaning at a very low sound level – making daytime cleaning convenient and hassle-free. Whether cleaning a stairwell, elevator, entrance, or any other area where electricity is inaccessible, the QuickStar B vacuum provides best-in-class 60 minutes of continuous cleaning time. With a very low sound level of only 50 dB A, the QuickStar B can easily be used for daytime cleaning without disturbing occupants.

A flexible battery configuration makes the QuickStar B vacuum simple to use. Powered by two lithium ion batteries, an operator can clean for up to 1 hour before needing a charge. A single battery can be used for 30 minutes of cleaning while the other battery is being charged. Total charge time is approximately 60 minutes for a single battery or two hours when both are charged at the same time.

By having the freedom to clean anywhere on any floor, an operator's productivity is maximized with the QuickStar B vacuum as less time is spent looking for electrical outlets while cleaning. Operators are not wasting time unwrapping and wrapping cords when moving between destinations. The QuickStar B canister vacuum will easily transition between cleaning carpet and hard floors to vertical surfaces with standard accessories.

The QuickStar B canister features three levels of filtration to clean the air before it is passed through the motor and expelled into the environment. This design protects the operator, motor, and the building's occupants from excessive dust circulation.

STANDARD ACCESSORIES INCLUDE

- Dry Basket Filter for Bag-less Operation
- 12 Inch Multi Purpose – Multi-Surface Floor Tool
